

# BLOOD DOPING

YouTube: "What do Performance-Enhancing Drugs do to your Body?" (3 mins)

YouTube: "What is Doping? Lance Armstrong's Secrets!" (5 mins)

## MY THOUGHTS...

Circle agree or disagree based on your feelings **before** watching any of the videos.

Blood tests are always accurate & can be trusted after 1 test.	AGREE / DISAGREE
Blood transfusions are the same as "Doping".	AGREE / DISAGREE
It is legal for athletes to conduct blood transfusions.	AGREE / DISAGREE
Blood transfusions give athletes an advantage for a long period of time.	AGREE / DISAGREE
Blood transfusions are equally beneficial for all types of athletes.	AGREE / DISAGREE
Lance Armstrong could have received blood transfusions from any of his teammates.	AGREE / DISAGREE

The people who administered Lance Armstrong's blood tests must have lied about the results.	AGREE / DISAGREE
Lance Armstrong deserved to have his Tour de France wins revoked.	AGREE / DISAGREE

## MY " NEW " THOUGHTS...

*Circle agree or disagree based on your feelings **after** watching any of the videos.*

Blood tests are always accurate & can be trusted after 1 test.	AGREE / DISAGREE WHY?
Blood transfusions are the same as "Doping".	AGREE / DISAGREE WHY?
It is legal for athletes to conduct blood transfusions.	AGREE / DISAGREE WHY?
Blood transfusions give athletes an advantage for a long period of time.	AGREE / DISAGREE WHY?
Blood transfusions are equally beneficial for all types of athletes.	AGREE / DISAGREE WHY?
Lance Armstrong could have received blood transfusions from any of his teammates.	AGREE / DISAGREE WHY?
The people who administered Lance Armstrong's blood tests must have lied about the results.	AGREE / DISAGREE WHY?

Lance Armstrong deserved to have his Tour de France wins revoked.	AGREE / DISAGREE WHY?

## PONDER IT...

*It is being recognized more and more that many competitive and professional athletes use alternative biological boosters to enhance their performance...*

Do you feel the use of these boosters is ethical? Should blood doping be illegal in sport? Why or why not?

Does knowing the prevalence of alternative enhancement in sport affect your understanding of success in sport?

Would the Olympics be more fun to watch if all athletes could freely use any enhancement **or** if all athletes were clean? Why?
